Subject: Here is the spreadsheet
Attachments: PFAS_Data Summary_Preliminary_01142021.xlsx

Basically my messages are

For Product

- Product (Anvil) stored in a fluorinated HDPE container has PFAS
- Product directly from production that was never in a container has low level of PFAS (background contamination)

For Containers (Rinse samples)

- Fluorinated containers have PFAS
- Non Fluorinated containers do not have PFAS

Only include detected compounds

Thanks

Thuy
